

A-CARD POKER

4-CARD POKER

4-Card Poker is a game that features three ways to play—against the dealer, against a pay table or both. Players use their best four of five cards dealt and the dealer uses the best four of six cards.

Wagers must be made in increments of \$5.

RANKING OF HANDS:

4-of-a-Kind / Straight Flush / 3-of-a-Kind / Flush / Straight / 2 Pair / Pair / High Card

Note: If a hand does not contain a pair or better, the hand that contains the highest ranking card(s) wins. Ace is high except in 4-3-2-A sequence.

PLAYING AGAINST THE DEALER—ANTE

This is a bet that the player's 4-card hand will beat the dealer's 4-card hand. If once the player looks at their hand, they believe it can beat the dealer's hand, a second bet called the Play Bet must be made. The Play Bet must be 1 to 3 times the Ante. The Ante and Play each are paid 1 to 1 when they win. The player wins ties.

AUTOMATIC BONUS

Players who place an Ante and Play wager win an automatic bonus payout on the Ante wager for the following premium hands. Automatic bonuses are paid even if the dealer has a better four-card hand.

4-of-a-Kind	25 to 1
Straight Flush	20 to 1
3-of-a-Kind	2 to 1

PLAYING AGAINST THE PAY TABLE—ACES UP

The object of betting the Aces Up wager is to receive a pair of Aces or better. If a hand contains a pair of Aces or better, the player wins the Aces Up wager. Players receive Aces Up payouts regardless of the dealer's hand.

THE PAYOUTS FOR THE ACES UP WAGER ARE:

Four-of-a-Kind	50 to 1
Straight Flush	40 to 1
Three-of-a-Kind	8 to 1
Flush	5 to 1
Straight	4 to 1
Two Pair	3 to 1
